GUIDE TO COURSE INFORMATION

Course Numbering System

The system of numbering courses prescribes that all courses use three digits to indicate the course level and/or type of course, and a three-letter subject designator to indicate the department or college.

- The first, or left, digit of the course catalog number indicates level.
- The second, or middle, digit may or may not indicate the study area, depending upon the curriculum structure of the particular department.

The following course catalog numbering guideline indicates the level and type of course:

Remedial and noncredit courses	000-099
Freshman-level courses	100-199
Sophomore-level courses	200-299
Junior- and senior-level courses	300-499
Joint undergraduate- and graduate-level courses	500-599
First-year graduate-level courses	600-699
Second- and third-year graduate-level courses	700-899
Readings, research, and individual study courses at the doctoral level only	900-996
Master's thesis	997
Individualized study program	998
Doctoral dissertation	999

Crosslisted Course: Two or more different subject designators, same or different course numbers, but with the same title and catalog description, e.g., ANT/NAT 447. Crosslisting may occur within a school or college, or between or among schools/colleges.

Double Numbered Course: Same subject designator, two different course numbers at the same or different levels, usually undergraduate and graduate, e.g., ANT 447/647

Experience Credit, Independent Study, Honors Thesis, Readings and Research Courses

All-University courses allow students considerable flexibility in developing individual academic programs. Students enrolled in any school or college within the University may enroll in these courses.

Students are advised to check carefully with their faculty advisors and the dean of their school or college before registering for an all-University course to be sure that the course will be accepted toward the completion of their degree requirements.

All students registering for Independent Study, Experience Credit, or Honors Thesis classes must make arrangements with a faculty sponsor prior to registration. **Students cannot register for Independent Study classes via MySlice registration.** Proposal for Independent Study Course forms, available in deans' offices and online, must be completed and submitted to the Registrar's Office, 106 Steele Hall. The form must have the signatures of the faculty sponsor, the chairperson of the department in which the student is taking the class, and for undergraduates the dean of the student's home college. Some classes may have an associated class fee.

Selected Topics Course (title may vary)

(Subject) (Catalog Number, usually ending in 00) Selected Topics 1-6 credits

Exploration of a topic (to be determined) not covered by the standard curriculum but of interest to faculty and students in a particular semester.

Experience Credit Course

(Subject) (Catalog Number, usually ending in 70) Experience Credit 1-6 credits

Participation in a discipline- or subject-related experience. Students must be evaluated by written or oral reports or an examination. Limited to those in good academic standing. The student must get permission, in advance, from assigned instructor, department chair, or dean.

International Course

(Subject) (Catalog Number, usually ending in 80) (Title and Name of Institution) 1-12 credits

Offered through Syracuse University Abroad (SU Abroad) by an educational institution outside the United States. Student registers for the course at the foreign institution and is graded according to that institution's practice. SU Abroad works with SU's academic department to assign the appropriate course level, title, and grade for the student's transcript.

Independent Study Course

(Subject) (Catalog Number, usually ending in 90) Independent Study 1-6 credits

In-depth exploration of a problem or problems. Individual independent study upon a plan submitted by the student. The student must get permission, in advance, from assigned instructor or department chair. May be repeated for credit.

Honors Thesis Course

(Subject) (Catalog Number 499) Honors Thesis 3-6 credits
The "499" number is used as needed by all departments in the University.

A seminar format course including discussions, student presentations and writing assignments that provides an introduction to the Developmental Neuroscience primary research literature. We will cover general principles of how a functioning nervous system is made in developing animals. Topics will be focused mainly on the central nervous system with many examples drawn from vertebrate model systems. Specific topics will potentially include how neural tissue is made, how the spinal cord is patterned, how nerve cells (neurons) acquire distinct fates, and how neurons know when and where to extend their axons.
	28687	SEC M004	TBA		Althoff	3.0	Class Topic: Molecular Ecology. Jrs. & Srs. only. Prereq: BIO 345. Meets with Bio 600-004. The use of molecular techniques to survey genetic variation has revolutionized the study of ecology and evolution. In this course, students will read the primary literature, analyze data, and discuss the conceptual and empirical basis for the application and interpretation of genetic data as it pertains to ecology and evolution. A broad range of taxonomic groups will be surveyed as well how molecular ecology is used in both basic and applied aspects of biology. The seminar style course will include lectures, discussions, and student presentations.
	17355	SEC M005	TTh	12:30PM-01:50PM	Belote	3.0	Class Topic: Model Organism Genetics. Jrs. & Srs. only. Prerequisites: BIO 326 & 327. Meets with BIO 600-005. The shared evolutionary history of all life makes it possible to use genetically tractable organisms to study fundamental aspects of cell and developmental biology, as well as to explore the molecular basis of many human diseases. This course will focus on six of the most common model genetic systems (yeast, worms, fruit flies, zebrafish, mouse and mustard weed), examining the unique genetic features of each, and how they are being used to investigate such topics as animal and plant development, cell growth and cancer, neurological disease, behavior, and aging. The format of this seminar course includes lectures, student presentations, discussions, quizzes and writing assignments.
	16229	SEC M007	TTh	11:00AM-12:20PM	Dorus	3.0	Class Topic: Human Disease Genomics. Jrs. & Srs. only. Prerequisites: BIO 326 & 327. Meets with BIO 600-007. Rapid advances in the sequencing and analysis of human, non-human primate and Neanderthal genomes has revolutionized the manner in which the molecular basis of human disease is being investigated. This seminar course will introduce students to influential genomic studies of relevance to the etiology and epidemiology of human disease. We will also discuss recent insights into the genetic basis of human adaptation and its potential relevance to disease predisposition. Seminar format including lectures, discussions, student presentations and writing assignments.
